

Experienced SAS Programmer

BioStata is a Contract Research Organization (CRO) who specializes in Data Management and Statistics.

We are offering all data Biometrics services required in relation to clinical and device trials, including statistical planning and reporting for Pharmaceutical, Biotech and device companies.

We are data managers, SAS programmers and statisticians, and our office is located in Birkerød. We are growing steadily and are currently 12 employees.

BioStata strives to deliver high quality products to our clients and believes, that focus on work-life balance is an essential component to achieve this goal.

We have a group of SAS programmers with various key competencies, and are now seeking a new colleague to join our team.

Our new colleague should have previous experience from the pharmaceutical industry, preferably hands-on experience with CDISC, be flexible and able to work independently.

You will be working together with our statisticians, data managers and programmers on a great variety of projects and tasks, and you will be working with small as well as large pharmaceutical companies.

We hope to hear from you.

Applications to: Peter Lipczak, pl@biostata.com, tel. +45 2010 0556.

In general, we are open to applications – if you are interested in a job at BioStata, please send us an application, allowing us to be ready for required expansion when needed.
