

SAS Programmer

BioStata is a Contract Research Organization (CRO) who specializes in Data Management and Statistics.

BioStata offer all Biometrics services required in relation to clinical and device trials, including Data Management.

We are data managers, statistical/SAS programmers and statisticians, and our office is located in Birkerød.

We are now seeking a new colleague to join our team of Statistical/SAS programmers.

Our new colleague should have one or more of the following competencies:

- SAS Programming experience.
- A background in clinical research or interest in the area.
- Experience with CDISC SDTM/ADaM.

In addition to the above mentioned:

- Fluent in oral and written English.
- Able to work structured, independently and with a flexible mindset.

Depending on your competencies, some additional training may be provided.

You will be working together with our statisticians, data managers and programmers on a great variety of projects and tasks, and you will be working with small as well as large pharmaceutical/biotech companies.

For further information or Application please contact: Peter Lipczak,
